1 Clapp Oscillator

振荡器设计如下

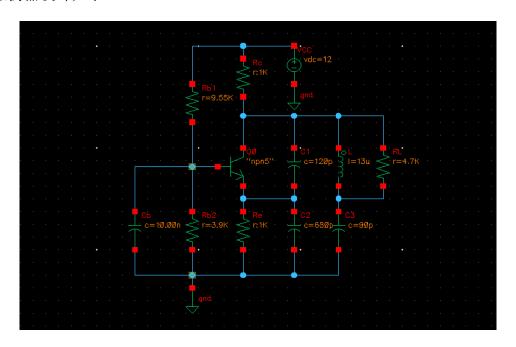

图 1: 克拉泼振荡器

振荡器输出如下:

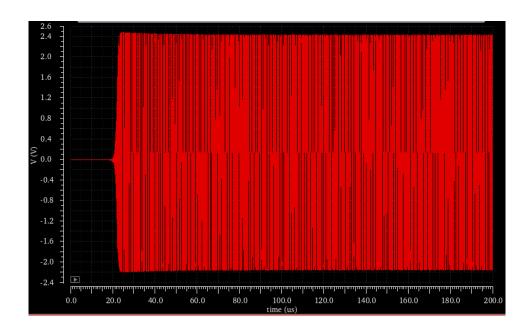

图 2: 振荡器输出信号

2 串联晶体振荡器

振荡器电路设计如下:

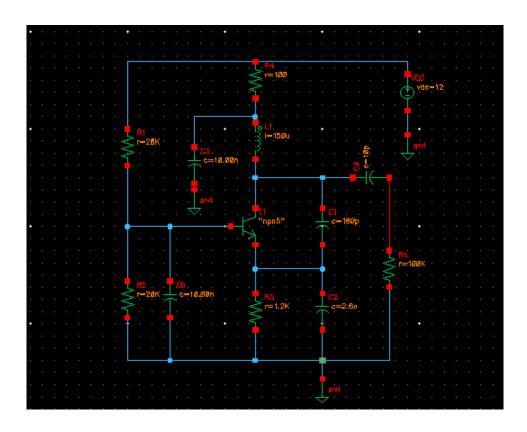

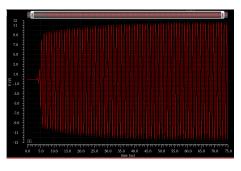

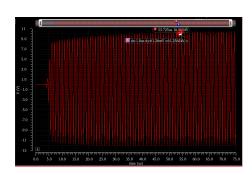

图 3: 克拉泼振荡器

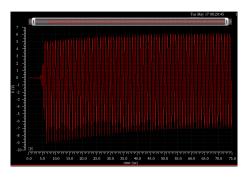

考察 $R_L = 100k\Omega, 33k\Omega, 10k\Omega$ 的输出波形:

(b) $R_L = 33k\Omega$

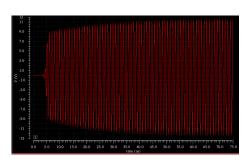

(c) $R_L = 10k\Omega$

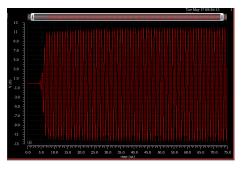

图 4: 改变 R_L 后输出

通过扫描,得到不同 I_{CQ} 对应的 R_{b2} 数值:

$I_{CQ}(mA)$	$R_{b2}(k\Omega)$
3.0	45.080
1.0	5.078
0.5	2.967

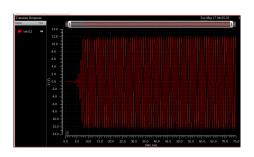

考察 $I_{CQ}=3mA,1mA,0.5mA$ 的输出波形 ($R_L=100k\Omega$):

(a) $I_{CQ} = 3mA$

(b) $I_{CQ} = 1mA$

(c) $I_{CQ} = 0.5mA$

图 5: 改变 I_{CQ} 后输出
